Welcome to Butte College! Computer technology is an integral part of your path to success. Did you know that many of our face-to-face classes have a computing component? Also, our registration, advising, financial aid, library research and other services are available online.

If you are not yet comfortable using computers, feel you’re in information overload, or just want to sharpen your skills to succeed in college and beyond, we suggest taking a few of our computer workshops or enrolling in a fast-track or full-semester 1-3 unit class on computer and/or information literacy.

See the other side for a detailed list of low-cost computing resources.
